# ACADEMIC NEWSLETTER - BHIMS

## Dr. Chandrashekhar E. Deopujari

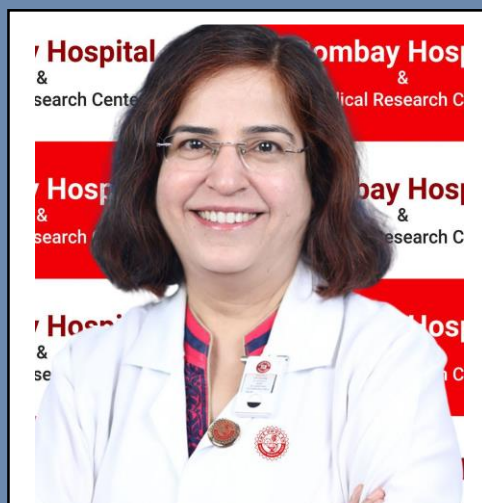

### Chapters:

- Chandrashekhar E. Deopujari, Salman Shaikh, Krishna Shroff: Failure of Endoscopic Third ventriculostomy (ETV) Jan 2023 Cerebrospinal Fluid and Subarachnoid Space (pp.431-442).
- Krishna Shroff, C E Deopujari, Vikram Karmarkar, Chandan Mohanty, Cystic Cerebral Cavernous Malformations: Report of Five Cases and a Review of Literature, Asian Journal of Neurosurgery 18 (12), June 2023
- Neuroendoscopy: Intraventricular and Skull Base Tumor Resection in Children, Child Nervous System 39 (10):1-20, August 2023.

### Conference Attended

- Invited as a faculty for the 24th Annual Indian Society of Neuroanaesthesiology & Critical Care 2023, Hyderabad
- Deliver an oration in Andhra Medical College in Vizag, VHS Hospital
- Delivered a talk on Ramamurthi Centenary celebration in Chennai.
- Invited for INDSPNCON [INDIAN SOCIETY OF PEDIATRIC NEUROSURGERY] 3rd to 5th February 2023
- Invited as a faculty for Satellite Meeting of The Indian Society for Pediatric Neurosurgery, Kolkata 6th to 8th February 2023.
- Attended International Conference on Complications in Neurosurgery 10th -12th March 2023.
- Invited as a faculty for 8th Annual Meeting of Neuroendoscopy Society India [Neuroendocon] 23rd-25th March 2023
- Invited to the European Society of Pediatric Neurosurgery Annual Meeting in Rome 7th-10th May 2023
- Invited as a speaker in Nepal for Neuroendocon on 17th-19th June 2023
- Attend as a faculty member for the Art of Microneurosurgery 8th-9th July 2023
- Invited as National Faculty of Endoscopic Anterior Skull Base Approach 21st-22nd July 2023.
- Attended 2nd World Congress of Young Neurosurgeons (ACNS-YNS).28th July to August 01st 2023.
- Attended ISPN Conference 2023. From 21st September to 23rd September 2023.
- Invited for Skull Base Neurosurgery Hands-on cadveric workshop & Cadaveric Hands-on workshop Audio- Visual Demonstration 29th September- 01st October 2023
- Attended as a faculty in Neuroconnect 2023 7th October – 8th October 2023.
- Attended Conference Skull Base Surgery Society of India SKULL BASECON 2023 27th- 29th October 2023.
- Attended as a National Faculty in International Federation of Neuroendoscopy IFNE 2023. 17th November to 22nd November 2023.
- Invited for Faculty in World Academy of Neurosurgical Society 1st December- 3rd December 2023.
- Invited for Faculty in World Federation of Neurosurgical Society 4th December- 8th December 2023
- Attended NSICON 2023 in Bhubaneswar from 14th December- 16th December 2023.

An intriguing article to apply vascularized lymph node transfer for treating filariasis, the most common cause of lymphedema in the world. This article can be an impetus to design a clinical study to define this mode of treatment. [bit.ly/3npGAtO](https://bit.ly/3npGAtO)

Efficacy of Vascularized Submental Lymph Node Transfer with Decongestive Therapy and Antibiotics for Early-Stage Lower Limb Filarial Lymphedema

George De Santis, MD, Bharat Saxena, MD, Maria Starnoni, MD, Marco Pappalardo, MD, PhD, Vinay Jacob, MD, Modena, Italy and Mumbai, Maharashtra, India

**Background:** Filarial lymphedema (FLE) is the most common cause of secondary lymphedema, with endemic prevalence in developing countries. FLE traditionally has been managed with antibiotics and decongestive therapy (DCT) in the early stage or excisional surgery at the late stage. Results of vascularized lymph node transfer (VLNT) in postoncologic lymphedema have been encouraging, and VLNT is a widely accepted surgical treatment. The authors advocate that the combined treatment of antibiotics, DCT, and vascularized submental lymph node (VSLN) transfer could produce objective and subjective improvement of early-stage lower limb FLE.

**Methods:** Between January of 2019 and January of 2020, patients with early-stage lower limb FLE who underwent VLNT were retrospectively reviewed. VLNT was harvested from the submental region in all patients. Outcomes were assessed using volume improvement, frequency of cellulitis, and lymphoscintigraphy, along with subjective scoring questionnaire.

**Results:** Three men and one woman with an average age of 57 years (range, 35 to 59 years) were included. Two patients presented bilateral lymphedema. One patient was lost at 6-month follow-up and not included in the analysis. Patients showed an initial decrease in circumferential measurements after antibiotics and DCT of 2074 ± 471 cc (39% ± 9%). At a mean follow-up of 12.3 ± 6.2 months, further improvement of limb volume of 2389 ± 576 cc (45% ± 10%) was achieved following VSLN transfer. Lymphoscintigraphy demonstrated the uptake by the VENT with reduced dermal backflow and none of the patients had episodes of postoperative cellulitis. Patients reported excellent outcome on subjective scoring (average score, 9 ± 1) and returned to their daily activities without wearing compression garments.

**Conclusion:** The authors' early experience showed that VSLN transfer may represent an effective treatment option in the multimodal approach to early-stage lower limb FLE. (*Plast. Reconstr. Surg.* 151: 850e, 2023.)
